## AC/DC KILOVOLTMETERS

100kV (AC)/150kV (DC) RC Voltage Divider

SG3005 Digital AC/DC Peak Voltage Meter

**AC/DC KILOVOLTMETERS** is an indispensable instrument in every modern high-voltage laboratory and test field where it occupies a wide range of important functions. It is the most basic test for every test in the high voltage test filed.

KVF series **AC/DC KILOVOLTMETERS** make up by two parts. One is AC/DC RC voltage divider, the other is SG3005 AC/DC peak voltage meter.

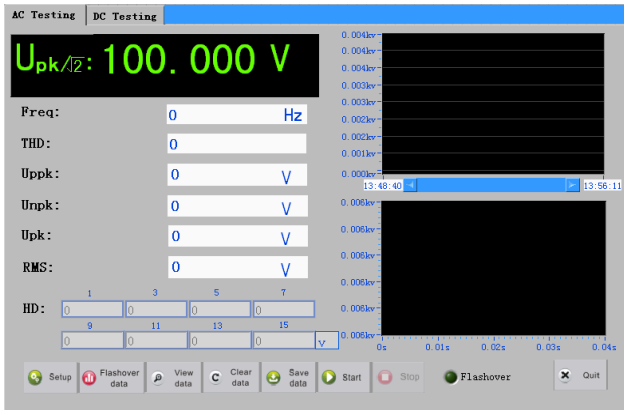

AC/DC RC voltage divider can be continuous running in the rated voltage, all high voltage arms and low voltage arm of RC voltage divider is self contained. It is more reliable and more convenient to moving.

SG3005 Digital AC/DC Measuring System is a microprocessor controlled device for accuracy measuring AC, DC and also can be used for testing voltage waveform distortion and ripple factor.

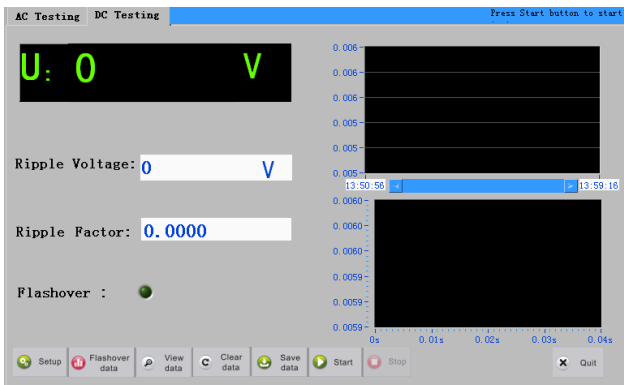

The SG3005 has implemented a flash detector which stores and shows the last voltage measurement and its polarity before a breakdown or flashover occurs.

### Features:

- ◆ Precision accuracy and lasting reliability, national instrument hardware inside.
- ◆ Portable, rugged units for the field or laboratory testing.
- ◆ Normally 10V-1200kV models available to satisfy a wide range of testing applications.
- ◆ In all testing range arrive 0.5%(AC), 0.5%(DC) accuracy. If using standard capacitor as high voltage arm and low voltage arm, the accuracy can arrive 0.005% AC testing..
- ◆ AC voltage measurement by capturing Frequency, THD, Uppk, Unpk, Upk, RMS, HD, Peak/:2 values and flashover voltage.
- ◆ DC voltage measurement and it's ripple factor.
- ◆ Flash detection of AC and DC flashovers. The generator can automatically be stopped from recharging.
- ◆ Plotter output for recording of AC and DC voltages on an external X-Y graph recorder.
- ◆ BNC, R16,LEMO signal interface can be accepted.
- ◆ K1.K2 (Voltage divider ratio) can be set easily.
- ◆ Display the waveform and the voltage running waveform.
